- Numerical fluency
- Memory and attention to detail

By working through problems in French, students also strengthen their bilingual skills, which can support cognitive flexibility.

Anatomy of a Second Grade French Word Problem

Understanding the typical structure of these problems helps teachers craft effective exercises and students to approach them confidently.

Common Components

- Context or Storyline: A simple, relatable narrative that introduces the problem.
- Question: The specific task the student needs to solve.
- Data: Information provided in the story, often numbers, objects, or people.
- Operations: The mathematical actions required to find the solution, such as addition or subtraction.
- Answer: The solution, often expressed numerically, sometimes accompanied by words.

Example Breakdown

"Marie a 12 pommes. Elle en donne 3 à son ami. Combien de pommes Marie a-t-elle maintenant?"

- Context: Marie has 12 apples.
- Data: 12 apples, gives away 3.
- Question: How many apples does Marie have now?
- Operation: Subtraction ($12 - 3$).
