- Seal tightly and process in boiling water bath if necessary.

2. Fermentation

Fermentation is a traditional Lebanese technique for preserving vegetables and dairy products. It involves natural fermentation by beneficial bacteria, which produce lactic acid, creating an environment hostile to pathogens.

Examples:

- Pickled cucumbers, turnips, and cabbage.
- Fermented dairy products like labneh.

Tips:

- Use clean, non-reactive containers (ceramic or glass).
- Submerge vegetables fully in brine.
- Allow fermentation at room temperature, then store in cool areas.

3. Drying and Sun Preservation

Sun-drying is one of the oldest methods, especially for fruits and herbs. It reduces moisture content, inhibiting microbial growth.

Process:

- Select ripe, healthy produce.
- Slice uniformly and arrange on drying racks or mats.
- Cover with fine mesh to protect from insects.
- Bring indoors during humidity or rain.
- Store dried items in airtight containers.

4. Salting and Brining

Salt acts as a preservative by drawing out moisture and inhibiting bacteria.

Applications:

- Preserving olives.
- Making salted vegetables.
- Curing meats, if applicable.

Tips for Successful Mouneh Preservation

Preserving foods effectively requires attention to detail and hygiene. Here are some essential tips:

1. Use Clean Equipment

Always sterilize jars, lids, knives, and cutting boards before use to prevent contamination.

2. Maintain Proper Salt and Sugar Ratios

Accurate measurements ensure preservation without spoilage. For pickles, a typical brine contains 2-3% salt; for jams, high sugar content acts as a preservative.

3. Control Temperature and Humidity

Store preserved foods in cool, dry, and dark places to extend shelf life and maintain quality.

4. Label and Date

Always label jars with the date of preservation to monitor freshness and plan consumption.

5. Regular Inspection

Check stored mounneh periodically for signs of spoilage, mold, or bulging lids, and discard compromised items.
